

OGB Pharmacy Benefits Program Full Formulary
Administered by MedImpact
April 2020

Foreword

A formulary is a list of both generic and brand-name prescription drugs that are preferred by a prescription drug program. The purpose of the MedImpact formulary is to provide your doctors and pharmacists with a method to evaluate the safety and effectiveness of commercially available prescription drugs.

The MedImpact formulary is developed by **MedImpact Healthcare Systems Pharmacy and Therapeutics (P&T) and Formulary Committees**. The committees meet quarterly, and more often if needed, to review new and existing medications and select drugs to be included in the formulary based on safety and usefulness.

Therefore, the formulary **may** change during the plan year. Please contact MedImpact at (800) 910-1831 if you have any questions regarding the formulary.

The MedImpact P&T and Formulary Committees use the following criteria in the evaluation of the drugs they review for inclusion in the formulary:

- Drug safety
- How well the drug works
- Comparison of therapeutic benefits to current formulary agents of similar use
- Minimization of therapeutic duplication between similar medications
- Cost effectiveness

How to Use the Formulary

The MedImpact formulary includes three important components. Understanding these components and how they work together can help you save money.

1. All drugs are listed on the formulary in alphabetical order by their generic names and/or most common branded name. If an FDA-approved generic equivalent is available, the generic name is **bolded**.

A generic drug is the same as a brand-name drug in terms of:

- Active ingredient(s)
- Dosage
- Safety
- Strength
- Quality
- The way it works
- The way it is taken
- The way it should be used

Savings Tip: When a generic drug is available, it's worth a conversation with your doctor to determine if this alternative will effectively treat your condition.

2. All drugs are assigned to a cost tier. The cost tier is designed to help you understand how much your prescription may cost.

Savings Tip: The lower the tier, the lower your out-of-pocket cost.

- TIER 0: Essential health benefit (EHB) Zero Copay/Preventive medications
- TIER 1: Preferred generic medications (formulary agents)
- TIER 2: Preferred medications (formulary agents)
- TIER 3: Non-preferred medications (non-formulary agents)
- TIERS 4, 5, and 6: Specialty medications

Savings Tip: If your prescribed drug is identified as Tier 2 or 3, ask your doctor if there is a Tier 1 generic drug that will effectively treat your condition.

The table below shows your costs for prescription drugs at the various tiers, both before and after you meet the out-of-pocket threshold:

	Before You Meet the Out-of-Pocket Threshold*, You Pay... (per 31 day supply)	After You Meet the Out-of-Pocket Threshold*, You Pay... (per 31 day supply)
Generic (Tier 1)	50% up to \$30	\$0 co-pay
Preferred (Tier 2)	50% up to \$55	\$20 co-pay
Non-Preferred (Tier 3)	65% up to \$80	\$40 co-pay
Specialty (Tiers 4/5/6)	50% up to \$80	\$40 co-pay

*Your out-of-pocket threshold is \$1,500

90-day fill option at retail or mail order network pharmacies:

For maintenance medications, 90-day prescriptions may be filled for the applicable coinsurance with a maximum that is two and a half times the maximum copayment. For example, if your share of the cost of a generic drug is \$30, you can fill your 30-day prescription for \$30 or a 90-day prescription for \$75.

3. If a drug has prescribing guidelines, those guidelines are identified with the following symbols:

Symbol	Guideline	Description
AGE	Age Edit	Coverage may depend on patient age
G	Gender Edit	Coverage may depend on patient gender
PA	Prior Authorization	Requires specific physician request process
QL	Quantity Limit	Coverage may be limited to specific quantities per prescription and/or time period
ST	Step Therapy	Coverage may depend on previous use of another drug

Please refer to the prescribing guideline appendix within this document for details regarding specific agents.

As you can see, the formulary includes important and potentially cost-saving information.

Savings Tip: Schedule time with your doctor to review this formulary and all of your prescription drugs. It's always a good idea to periodically review your prescription drugs with your doctor. This review could possibly save you money.

Benefit Coverage and Limitations

The formulary applies only to drugs prescribed in an outpatient setting. It does not apply to medications used in inpatient settings.

If you have specific questions regarding your coverage, you can contact MedImpact at (800) 910-1831.

Depending on your specific prescription program benefits, the following topics may apply:

1. *Generic Substitution*

When available and not prohibited by any existing state statutes, you will be required to use FDA approved generic drugs in all situations, regardless of any brand name indicated.

If you or your doctor request a brand name drug in place of an approved generic drug, you will be required to pay the difference in cost between the brand and the generic. If your doctor determines that there is a documented medical need for the brand drug equivalent, a request for coverage may be made using the medication request process.

2. *Tier Benefit Design*

Your pharmacy benefit is a tier benefit design, which means you share the cost of prescription drugs based on the drug's tier and copayment or coinsurance. In most instances, preferred generic drugs will be covered in a separate, lower tier (low copay); preferred branded drugs listed on the formulary will be covered under a higher tier; and drugs not on the formulary will be covered under a separate non-preferred drug copay tier. Specialty drugs will be covered under the highest tier (highest copay). Essential health benefit/preventive medications, if available on the formulary (applies to new and non-grandfathered plans), will be covered at no cost to you.

3. *Step Therapy*

Step Therapy is used to promote cost-effective pharmaceutical management when there are multiple effective drugs to treat a condition. Drugs that are listed in the formulary as Step Therapy (ST) require one or more "prerequisite" first step drugs to be tried before progressing to the second step drug. Most drugs that call for step therapy require that you fill a generic drug before filling a brand name drug. The overall cost of the generic drug is usually lower than the brand named drug. If medically necessary, a second step drug can be obtained without first trying a first step drug by submitting a completed Medication Request Form. Each request will be reviewed on an individual patient basis. Approval will be given if a documented medical need exists. The following basic guidelines would be used to evaluate whether medical need exists to approve a higher-tier drug:

- The use of the first step drug is not recommended for the patient.
- The first step drug is not suited for the present patient care need, and the drug selected is required for patient safety.
- The use of the first step drug may provoke an underlying condition, which would be detrimental to patient care.

4. *Dispense As Written (DAW Penalty)*

If you or your doctor requests a brand-name medicine when a generic alternative is available, your prescription cost will be higher. You will pay the brand copay plus the difference in cost between the brand-name and the generic medicine. The penalty amount does not count toward the out-of-pocket maximum; you'll pay this penalty even after you've met the out-of-pocket maximum.

Direct Member Reimbursements

When you file a claim for reimbursement, the amount refunded will be limited to the rate contracted at the pharmacy minus your applicable copay, which may be less than the actual retail price paid.

5. **Medication Request Process**

Depending on your pharmacy benefits program design, a prior authorization process may be required:

A. **Coverage Exceptions**

Your prescription drug program allows coverage for drugs and medications approved by the U.S. Food and Drug Administration (FDA) or its successor that require a prescription. Utilization management criteria may apply to specific drugs or drug categories.

Drugs that are listed in the formulary with a Prior Authorization (PA) designation require evaluation before they will be filled. You and your doctor must request the PA review and the review will be evaluated based on your individual situation. If your request does not meet the guidelines established by the P&T Committee, the request will not be approved; however, alternative therapy may be recommended.

The prior authorization process allows your doctor to request coverage of a non-formulary or non-covered drug. Your doctor may request prior authorization for a certain quantity, dosage, or dosage form of a drug that is not covered under your pharmacy benefit. Prior authorizations are completed by your doctor on a Medication Request Form. Most prior authorization requests are handled within two business days. Once your prior authorization is approved then your drug will be covered under your pharmacy benefit. If your request is not approved, you will receive a letter explaining why the request was not approved and the steps you can take to appeal the decision.

Compound Drugs:

All compound drugs that cost more than \$400 per prescription require prior authorization through MedImpact.

B. **Obtaining Coverage**

Coverage, questions or information regarding the medication request or formulary process may be obtained by:

- a. Faxing a completed **Medication Request Form** to MedImpact at (858) 790-7100.
- b. Contacting MedImpact at (800) 910-1831 and providing all necessary information requested.

MedImpact will provide an authorization number, specific for the medical need, for all approved requests. Non-approved requests may be appealed. Your doctor must provide information to support the appeal on the basis of medical necessity.

Prior Authorization is generally not available for drugs that are specifically excluded by your pharmacy benefits plan.

In the event that you do not present your identification card to the network pharmacy at the time of purchase, you will be responsible for full payment for the drug and must then file a claim with MedImpact for reimbursement. Reimbursement is limited to the rate contracted at the pharmacy minus your applicable copay, and may be less than the actual retail price paid.

Retirees with Medicare will be automatically enrolled in your plan's Medicare Part D coverage with a commercial wrap benefit.

Your pharmacy benefit provides coverage up to \$200.00 per month for expenses incurred for the purchase of low protein food products for the treatment of inherited metabolic diseases if the low protein food products are Medically Necessary and are obtained from a source approved by your pharmacy benefits program. Such expenses shall be subject to coinsurance and copayments relating to prescription drug benefits. In connection with this benefit, the following words shall have the following meanings:

- a. "Inherited metabolic disease" shall mean a disease caused by an inherited abnormality of body chemistry and shall be limited to:
 - Phenylketonuria (PKU)
 - Maple Syrup Urine Disease (MSUD)
 - Methylmalonic Acidemia (MMA)

- Isovaleric Adicemia (IVA)
- Propionic Acidemia
- Glutaric Acidemia
- Urea Cycle Defects
- Tyrosinemia

- b. “Low protein food products” mean food products that are especially formulated to have less than one gram of protein per serving and are intended to be used under the direction of a physician for the dietary treatment of an inherited metabolic disease. Low protein food products shall not include natural foods that are naturally low in protein.

Coverage is available for prescription and over-the-counter (OTC) smoking cessation medications when prescribed by a physician. (A prescription is required for over-the-counter medications). Certain smoking cessation medications are not subject to the prescription drug deductible and are covered at 100%.

Appeals

You have a right to appeal any decision that denies payment for an item or service (in whole or in part).

To file an appeal you can call MedImpact at **(800) 910-1831** or write them within **180** days from receipt of a denial to the following address:

- Brand name Proton Pump Inhibitors (PPIs)
- Glumetza
- Brand name products with OTC ingredients

- May amend in accordance with law

7. ***Pharmacist and Physician Communication***

The formulary is a tool to promote safe, useful, and cost-effective prescription drug use. The P&T and Formulary Committees have made every attempt to create a formulary and process that meets all therapeutic needs; however, the art of medicine makes this a formidable task. MedImpact welcomes the participation of physicians, pharmacists, and ancillary medical providers, in this dynamic process. Physicians and pharmacists are encouraged to direct any suggestions, comments or suggested formulary additions to MedImpact at the following address:
