1.2 PROCESSING NOTES:

1.2.1 REVERSALS

Reversals must be submitted with the SAME Rx number as was submitted on the Original Paid Claim. This is per NCPDP transition guidance and should be noted by Pharmacies that are truncating Rx Numbers with 5.1 and plan to expand the size with D.0.

- Reversals must contain the Pharmacy ID, Rx Number, Date of Service and the reversal must meet all D.0 syntax requirements as noted in the "Formatting Rules" bullet below.
- If more than one paid claim exists for the same combination noted above, the following are used as 'tie breakers' as necessary: Refill number, Other Coverage Code, Other Payer Coverage Type.
- Due to 4 RX Matching requirements, BIN, PCN, Cardholder Id and Group must be submitted as provided on original PAID claim.

1.2.2 REVERSALS OF COB CLAIMS

These should be performed in the correct "back out order" meaning LAST claim billed must be Reversed First until getting to the Primary Claim or a Claim to be re-submitted.

- If a claim has been billed as Primary, Secondary, Tertiary and the pharmacy wishes to re-process the Secondary claim, the Tertiary Claim must be reversed first, then the Secondary and then they can re-process the Secondary claim.
- The reversal of a COB claim beyond secondary should contain the COB Segment with Other Payer Coverage Type so in the instance that MedImpact is the payer of more than one claim for the Pharmacy, Rx, Date of Service and Fill number, the claim for reversal can be identified correctly.

1.2.3 TRANSACTION TYPES

Supporting B1 (Claim) and B2 (Reversal)

- B3 (REBILL) is NOT supported

1.2.4 ADDITIONAL DATA

MedImpact does not have plans to require MORE data fields than are noted in this document. Other features may be built out over time and a new Payer Sheet will be published. See Section indicated as REVISIONS in Table of Contents.

1.2.5 FORMATTING RULES

MedImpact is editing incoming data per guidelines of the NCPDP standard. Please note the following:

1.2.5.1 GENERAL RULES

- Lowercase values are not accepted
- We do NOT require Patient e-mail address (seeing this commonly sent as lower case)
- Gross Amount Due value must sum according to NCPDP formula
- If a field 'tag' is sent then something must be sent as the field value.
- If a Segment Id is sent, then some of the fields of that segment must also be submitted.
- All fields submitted are validated against format rules for that field (A/N, size, etc.)
- Cardholder Id - Trailing spaces are not allowed – the exact submission is used in Member lookup.
- Code values are validated against NCPDP ECL values
- Any field requiring a "Qualifier' must be preceded by the appropriate qualifier
- Any field that repeats must have the "Count" field precede it
- Reversals MUST include the Fill Number for matching to proper claim in case more than one fill per day was approved (i.e. vacation fill)
- Phone numbers must be 10 digits
- If any of the three Percentage Tax fields are submitted the other 2 fields are required.
- Zip Code fields are not to contain a Dash (see criteria for Patient ZIP Code field in Data Dictionary.)
- DUR submissions must be ordered by the DUR counter field.

1.2.5.2 COORDINATION OF BENEFITS - COB

- If Other Coverage Code is 0 or 1 and a COB Segment is submitted this will cause a reject.
- If Other Coverage Code is 2 or greater a COB Segment is required
- Other Payer Patient Responsibility data is not allowed for Part D COB processing.

1.2.5.3 COMPOUNDS

- If Compound Code is 1 (Claim is NOT a Compound) and a Compound Segment is submitted this will cause a reject
- If Compound Code is 2 (Claim is a Compound) – the Compound Segment is required.;
- When Compound Segment is submitted, the Product/Service Id Qualifier must be 00 and Product Service Id must be 0 (one zero) per Implementation Guide
- Compound Ingredient Costs must sum to the Ingredient Cost in the Pricing Segment
- If a compound Ingredient cannot be identified, the claim will Reject with:
  Reject Code 54 (Non-Matched Product/Service ID Number)
  and will be accompanied by the Text Message:
  CLAIM COMPOUND DRUG nnnnn-nnnn-nn HAS INVALID NDC.
  - N's will be replaced with the invalid NDC submitted value
  - For valid products, pharmacy needs to request addition of the NDC by providing evidence of product in order for this to be added to the product file by FDB.

1.2.5.4 MEDICARE PART D ALLOWS FOR 1 TRANSACTION PER TRANSMISSION

- Please refer to Section 7 CLAIM BILLING OR ENCOUNTER INFORMATION of the NCPDP Implementation Guide to find the following:
  - "For Medicare Part D processing only one transaction per transmission is permitted because there is a need for the sequencing of the True Out Of Pocket (TrOOP) update

before the next claim is processed. The TrOOP should be updated before subsequent claims are

- Since our Bin 015574 is unique for Part D claims only please set your claim format to ONLY submit single transactions so pharmacy does not incur a reject for this reason.

On January 16, 2009 HHS published a final rule adopting ICD-10-CM (and ICD-10-PCS) to replace ICD-9-CM in HIPAA transactions, effective implementation date of October 1, 2013. The implementation of ICD-10 was delayed from October 1, 2013 to October 1, 2014 by final rule CMS-0040-F issued on August 24, 2012. Updates to this version of ICD-10-CM are anticipated prior to its implementation. The Clinical Modification ICD-1Ø-CM for diagnosis coding code set is available free of charge on the National Center for Health Statistics (NCHS) web site at http://www.cdc.gov/nchs/icd/icd1Øcm.htm. From the code set maintainer: The ICD codes do have a decimal; however, for transaction/submission of the codes the decimal is not included in the code. The reporting of the decimal between the third and fourth characters is unnecessary because it is implied. (Field is alphanumeric; count from left to right for the third and fourth characters.)

CLAIM REVERSAL TRANSACTION

2.1.1 GENERAL REVERSAL NOTES:

2.1.1.1 REVERSALS RX NUMBER

Reversals must be submitted with the SAME Rx number as was submitted on the Original Paid Claim.

2.1.1.2 REVERSALS COB

Reversals of COB claims should be performed in the correct "back out order" meaning LAST claim billed must be Reversed First until getting to the Primary Claim or a Claim to be re-submitted.

- If a claim has been billed as Primary, Secondary, Tertiary and the pharmacy wishes to re-process the Secondary claim, the Tertiary Claim must be reversed first, then the Secondary reversal. At this point the pharmacy may re-process the Secondary claim and as required, the Tertiary claim as well/
- The reversal of a COB claim must contain the COB Segment with Other Payer Coverage Type so in the case MedImpact is the payer of more than one claim for the Pharmacy, Rx, Date of Service and Fill number, the claim for reversal can be identified correctly.
